Mini ITX Gaming PC - Ryzen 5600X, RX 6700XT, 16GB RAM, 1.5TB (1.200 EUR)

Locatie **Zuid-Holland, The Hague**

https://www.advertentiex.nl/x-1611354-z

The highlight is the small size and minimal aspect of the build. Using a limited edition aluminium mini ITX case - the Geeek Case G1 SE, this gaming PC has a clean look and fits on any desk.

Despite its size, the system runs cool and quiet by using 4 high-end Noctua fans for optimized airflow and a Corsair AIO cooler for the CPU, allowing it to boost to 4.7Ghz, 100Mhz over the advertised maximum boost clock.

As can be seen in the 3DMark benchmark, the PC obtains scores higher than other systems built with the same parts as a result of good silicon quality, good cooling and good maintenance: https://www.3dmark.com/spy/34821542.

The system comes with Windows (official version) pre-installed and ready to be used out-of-the box, without the need to troubleshoot or install additional drivers.
