

ARTECH PSTNamp VOIP two lines switch (AX520) (40 EUR)

Locatie **Flevoland, Dronten**
<https://www.advertentieX.nl/x-1611824-z>

Overview:

AX520 has 2 line and one phone jack. The line jacks can connect to PSTN line and VOIP line. Whenever there is a ring from either of them, the phone can ring and answer. When the user wants to make a phone call, it goes through LINE1 jack automatically. If user dials #, 0 before the telephone number, it will dial out from LINE2 jack. It is ideal for FXS VOIP units. Sometimes the users don't have enough line port on PBX or KTS. It can expand the number of CO line ports.

Features:

Two Lines Answering Automatically

You can connect two Lines at the same time and judge the telephone to be received according to rings.Auto Engagement

When a user is using either of two Lines, the other Line will be engaged automatically to make an incoming call transfer to next Line.Dialing Out From Fixed Line

LINE1 is used to dial telephone numbers fixedly.Forced Dialing Out From LINE2

LINE2 can be connected forcedly by pressing # ,0 before the telephone number you wanted.Multi-functional Indicator

In the standby mode, the double-color indicator lights in red every two seconds. When ringing, LINE1 flashes in red and LINE2 flashes in green. When talking, LINE1 lights in red and LINE2 lights in green.Flash Time Detection

During using the telephone set, if a user switches HOOK button with 800 ms, the auto switch will think the user hangs up a call and will connect to next line automatically. If the user switches HOOK button with 800ms, the auto switch will connect to next line switch.

1.Connect the AC/DC adaptor (DC18V/200mA)

2.Connect a telephone line (or an analog PBX inter line) to LINE 1 of AX520 and another line to LINE 2

3.Connect the telephone set (or the CO line interface of a PBX) to PHONE jack of.
