A powerful gaming computer is looking for a gamer that has time for gaming with a water-cooled CPU with 12 cores, RGB lights, 2 M2 SSD disks, and 32GB of ram.

Case is very spacious and is prepared for stunning upgrade by adding up to two water pumps.

Almost everything is in the warranty for about a year. The computer was never overclocked and was rarely used, about 5-20 hours a month. That is why I'm selling it, as it is kind of overkill for my rare gaming. I built this computer with the idea of gaming, but I'm failing to find time for that dream.

I want to sell or exchange this gaming computer for MacBook Pro M2 Pro or MacMini M2 Pro + money.

Values of new components approx 3200 euro. Most of them still in warranty.
