

# Audi RS3 S3 A3 originele 19 inch rotor velgen banden (1.150 EUR)

Locatie **Utrecht, Eemnes**  
<https://www.advertentiax.nl/x-1624122-z>

Originele 19 inch Audi RS3, S3, A3 rotor velgen te koop.

Velgen  
 Merk: AUDI  
 Inch: 19  
 steekmaat: 112x5  
 Et-waarde: 50  
 Naafdiameter: 57.1  
 Breedte: 8.0J

Banden  
 Merk: Goodyear  
 Model: Eagle F1 asymmetric 5  
 Maat: 225/35 R19 88Y XL  
 DOT: 0121

Heb ze als gepolijste set gekocht (zie laatste foto als voorbeeld) maar na het ontstaan van oxidatieplekjes door steenslag de velgen laten poedercoaten.

Op 2 velgen zit lichte stoeprandschade (zie foto's velg 1 en velg 2)

Heb ze bij de 4 (voorste) Eagle F1 asymmetrische 5 waar de profiel dieptes 6mm en 5mm en 4mm zijn (zie foto's) banden zijn 225/35 R19 88Y XL en gaan voor 100 een tijdje. De velgen worden vernieuwd en verkocht van de auto. Het is de laatste koopbonk, poedercoaten en banden er eventueel bij.

Geen onzinsbedingen!

|                                                                                                                                                                                                                                                     |                                                                                                                                                                                                                                                      |                                                                                                                                                                                                                                                      |                                                                                                                                                                                                                                                      |                                                                                                                                                                                                                                                       |                                                                                                                                                                                                                                                        |                                                                                                                                                                                                                                                        |                                                                                                                                                                                                                                                        |                                                                                                                                                                                                                                                        |                                                                                                                                                                                                                                                        |
