electric hand brake with hold and autorelease function, 3 point seat belts)

Tire tread depth (profiel diepte): 5.5 mm (LA, RA), 5.7 mm (LV, RV)

More about the car and seller (private individual):

I am an expat living in Eindhoven. Our beloved Toyota Corolla 1.8 Hybrid is for sale with Executive VIP package (this was the package's name in Hungary where the car was purchased). In the Netherlands I think it is Style, but with extra(s) like blind spot monitoring. It has a beautiful, unique color and it is still in a fantastic condition with no accident-damage history. The car has extremely low fuel consumption (around 4-5 liters/100 km in combined use). The car is 4 years old and has fresh APK and service on it arranged at a Dutch Toyota Dealership, so you can enjoy this car burden-free and confident enough that this car is in outstanding shape and will serve you perfectly in the next years.

The car has been our family's car since 2019. My father purchased it when it was only 2 months old, with only a few hundred kilometers in it. Since then he and I only put around 42000 kilometers in the car in total. I imported the car to the Netherlands from Hungary recently for my wife, but she preferred our much smaller electric car instead, so I decided to sell this one. All service appointments have been performed by an official Toyota dealership in Debrecen, Hungary. The service history is electronically recorded and I can show you in the official MyT Toyota app in the App Store using my father's Hungarian account. Furthermore, as mentioned, a fresh new Dutch service and APK was done recently, so you can be confident this car is well maintained and ready for the Dutch roads!

Note: The Toyota Corolla hybrid is an extremely reliable car, it's extremely low maintenance and you can be assured that this car will serve you well in the longer future. My father kept his 2008 Toyota Corolla, he still has it, because he had to do hardly any maintenance-service on it..

If you want to see the car, you are free to come to Eindhoven (or I can also drive somewhere closeby with it) and I can demonstrate its features to you and you can also enjoy a ride if you are seriously interested. Please visit us only if you are seriously interested knowing I am interested in offers around mid-20 thousands of euros. I am sure you will make a reasonable offer after seeing and trying it ;-)
The car is in use, so the "kilometerstand" may increase slightly (but only a little bit).

Feel free to reach out to me with any questions, even on weekends or after working hours, I am flexible.
The car can be viewed and purchased.
