

Ubiquiti Networks US-24 24-Port UniFi Managed Gigabit Switch (100 EUR)

Locatie **Drenthe, Assen**
<https://www.advertentienx.nl/x-1645190-z>

Ubiquiti Networks US-24 24-Port UniFi Managed Gigabit Switch with SFP

Network Switch

Key Features 24 x Gigabit RJ45 Ports 1 x Serial Console Port 26 Gb/s Non-Blocking Throughput

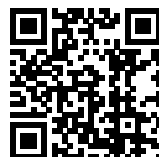

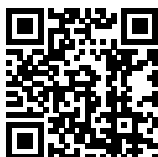

gebruikt gedurende 8 maanden voor AWS training
 Volledig gereset naar factory settings
 Fully up-to-date with latest firmware
 inclusief rack mount brackets

Management via Unifi SDN software

With 24 Gigabit Ethernet ports, the US-24 UniFi Managed Gigabit Switch with SFP is designed to simplify the process of expanding your network. In addition to Gigabit Ethernet connectivity, this fully managed switch offers SFP connectivity for uplinks of up to 1 Gb/s for ultra-fast connections to other switches or

network attached storage devices. This UniFi switch also features a 26 Gb/s non-blocking throughput, 52 Gb/s forwarding capacity, and 3.69 Mpps of forwarding performance. The switch also features a 26 Gb/s non-blocking throughput, 52 Gb/s forwarding capacity, and 3.69 Mpps of forwarding performance. The switch also features a 26 Gb/s non-blocking throughput, 52 Gb/s forwarding capacity, and 3.69 Mpps of forwarding performance. The switch also features a 26 Gb/s non-blocking throughput, 52 Gb/s forwarding capacity, and 3.69 Mpps of forwarding performance.

Switching Performance The UniFi Switch offers the forwarding capacity to simultaneously process traffic on all ports at line rate without any packet loss. The switch also features a 26 Gb/s non-blocking throughput, 52 Gb/s forwarding capacity, and 3.69 Mpps of forwarding performance. The switch also features a 26 Gb/s non-blocking throughput, 52 Gb/s forwarding capacity, and 3.69 Mpps of forwarding performance. The switch also features a 26 Gb/s non-blocking throughput, 52 Gb/s forwarding capacity, and 3.69 Mpps of forwarding performance. The switch also features a 26 Gb/s non-blocking throughput, 52 Gb/s forwarding capacity, and 3.69 Mpps of forwarding performance.

Ubiquiti Networks US-24 24-Port UniFi Managed Gigabit Switch

monitoring, configuration, maps, statistics, and admin accounts. Switch Configuration You can access any managed UniFi Switch through the UniFi Controller to configure a variety of features:

- Operation mode (switching, mirroring, or aggregate) per port
- Network/VLAN configuration
- Jumbo frame and flow control services
- Network settings
- Storm control setting per port
- Spanning tree configuration
- 802.1x control and RADIUS VLAN
- Debug terminal option for command-line interface

Switch Port Status You can also view status information for each port:

- Connection speed and duplex mode
- TX/RX data rates
- Network/VLAN
