Honda XR600 with the engine completely rebuild with forged Wiseco piston and an aggressive HOT CAM camshaft (see receipt). The bike has so much torque, it pushes like a beast. Furthermore, it has new tyres and final drive (300 km) with chain RK exw, sprockets and sliders. Also a new Rental 7/8 handle bar.

Perfect adventure bike with LOW MAINTENANCE, according to the manual the engine oil should be changed every 30 days of use or 1000 km! (the crf 450 needs new oil every 5-10 hours of use). It's a versatile bike also suitable also for enduro and cross.

Weak points: The plastics and the painting of the frame, but it's safe since I treated with Epoxi stop-rust that is also priming for painting.

I sell it with pain because I want to swap to a 2 stroke motor.
