 Description from the webpage:

The LG 38WN95C is the ultimate high-end entertainment monitor for gamers, Netflixers, professionals and multitask monsters. Yes, that's quite a bit! The 38WN95C is quite unique in its class. This ultrawide monitor contains almost all gaming specifications that make you ready for high-performance gaming. But the 38WN95C is also equipped with Thunderbolt 3 with power delivery of 94W. Ideal for Apple Macbook (Pro) users: with just 1 cable you share power, audio and video with this LG Monitor. The 38WN95C can even charge your Macbook! The monitor is unique in its class thanks to the Nano-IPS panel, which provides you with the best color reproduction and color fidelity. With 1ms response time, variable refresh rate from 144hz to 160hz, G-Sync compatible support, the 38WN95C is one of the fastest IPS ultrawide monitors at the moment. We can safely say that you are ready for next-gen gaming with this LG monitor.

Why Nano-IPS makes the LG 38WN95C unique in its class:

As the showpiece of the LG Ultragear series, the LG 38WN95C has just about all the features you could wish for as a gamer. But one of the important features to highlight is the Nano-IPS panel from LG's own factory. The 21:9 Nano-IPS panel provides you with a color gamut that is 35x larger than sRGB 100% and covers 98 % of the DCI-P3 spectrum. Simply put, this means that you no longer have to compromise between speed and image quality with a gaming monitor and the 38GN950 combines the best of both

worlds in 1 package. This makes the 38WN95C also very suitable for graphic design and designers.

One of all top-end features of the 38WN95C, a 38" Nano IPS panel, is what's nice is that you can use it for a lot of things. Considering the 38WN95C, a 38" Nano IPS panel, is what's nice is that you can use it for a lot of things. In addition, LG has equipped the 38WN95C with a series of special gaming optimisations, so that you can see your opponents even faster in dark conditions, for example. HDR600 also provides you with above-average color reproduction and brightness, which makes gaming even more intense.

Did you know...

the 38WN95C has a built-in light sensor which automatically adjusts the brightness for you? the difference in resolution from 3440 x 1440 to 3840 x 1600 seems like a subtle difference on paper, but
