

# Nieuwe Mitchell 198 molen, molenmaat 4000 amp 7 laggers (60 EUR)

Locatie **Overijssel, Enter**  
<https://www.advertentiax.nl/x-1656179-z>

Nieuw binnen bij Hengelsport Enter:  
 - Mitchell 198 molens

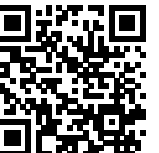

Deze Mitchell molen is gebaseerd op 3 kernwaarden: Krachtig, Sterk en Duurzaam. Deze molen wordt het ultieme instrument voor alle vormen van zeevisserij. Een legende is opnieuw geboren, maar het echte Mitchell uiterlijk en gevoel zijn bewaard gebleven.

Specificaties molen:

- 6+1 kogellagers inclusief anti-retour
- Dubbel geanodiseerde aluminium spoel
- Aluminium hendel
- Supersterk binnenwerk en gesealde slip
- Zoutwaterbestendig: duurzaam, sterk en krachtig
- Hoogwaardig slipsysteem: 11kg voor 398/498 modellen
- Innovatief ontwerp
- Extreem sterk aluminium molenhuis

Ideale molens voor het roofvissen op snoek, snoekbaars en baars

Maar door zoutwater bestendigheid ook ideaal onder een zeebaarshengel te gebruiken

|                                                                                                                                                                                                                                                        |                                                                                                                                                                                                                                                         |                                                                                                                                                                                                                                                         |                                                                                                                                                                                                                                                         |                                                                                                                                                                                                                                                          |                                                                                                                                                                                                                                                           |                                                                                                                                                                                                                                                           |                                                                                                                                                                                                                                                           |                                                                                                                                                                                                                                                           |                                                                                                                                                                                                                                                           |
