Kobo Elipsa, which I bought to take notes. Unfortunately, this is an excellent reading device, but not such a good writing device. For example, sometimes the pen stops working when you write, and you have to shake the battery a bit to get it working again (which is a known googlable problem). It takes 5 seconds to solve, but I found it annoying. That's why I switched to the Remarkable 2.

It is in good condition and has been well maintained. Comes in an original box with all.
