Loudlink LLK-BLUELITE Bluetooth adapter for Alfa 147. May work with other models, but cannot be sure as I used it on my 2007 model.

Connects to the CD changer connector on the back of the original stereo and offers Bluetooth connectivity for music and calling. Includes a Microphone that can be mounted on the side close to the door.

Installation is very simple as it is just a matter of removing the stereo (there are 4 holes that just need a stick - i used a "sate stick" to remove), plug in the blue plug and connect the microphone cable, and pull it under the steering wheel. Takes 15-20 min max.

I used it daily until I sold the car about one month ago. Used with iphone, but is compatible also with Android as it offers standard Bluetooth.

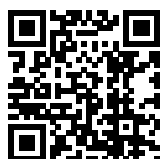

A google search for "llk-bluelite installation guide" will take you to the website of the manufacturer where the manual can be downloaded from.
