Characterized by an elegant, sporty design and lots of technical innovative elements, the Nolan N87 is the new top of the range road full-face helmet. The ventilation system ensures optimal ventilation and guarantees maximum comfort, even in extreme riding conditions. This helmet features a wind protector which prevents air infiltration from the chin area, but you can easily remove it. The removable and washable inner comfort padding is made with soft and fresh double density micro-perforated fabrics so with this knowledge you will always feel clean when wearing your helmet. This good-looking helmet also includes a large visor (scratch resistant ultrawide visor) which makes it possible to have a broader view. It features also a sunscreen with 400 UV protection which can be used in all sorts of situations. Both visor and sunscreen can be easily removed without tools. The helmet is ready for the use of the Nolan communication system (N-COM) and the Emergency Stop Signal (ESS) system. Nolan N87 is ideal for eyeglass wearers (Eyewear Adaptive) and features a Pinlock.
