I'm an expat and this was my first car here in the Netherlands. I'm selling it because I'll buy a new one next week. It's totally fine and I still use it. Little problems I've faced so far;

1- two times stopped in the traffic lights, but then I restarted it and continued my way with no problem;

2- two-three times it started but didn't move in the first try. Then I restarted and it's solved.

3-one of the keys is broken as seen in the pictures. I had no time to get it fixed thus I use the manual keys. So not a big problem for.
