I have a used Lenovo Legion Y530-15ICH-1060 81lb00bkpb gaming laptop with a Logitech G603 Lightspeed for sale.

The laptop is working perfectly fine despite some cosmetic flaws. The left mouse button under the trackpad and the screw pad next to the right screen hinge are slightly loose, but these issues do not hinder the use of the trackpad or hinge. The backplate is scratched (image attached).

Three months ago, I replaced the battery with a new one. At that time, an HDD was in the SATA slot, but it broke, so I replaced it with a Kingston A400 2,5" 960GB SSD. Since I had already disassembled the laptop, I also reapplied the thermal paste on the CPU and GPU.

Specification:
 CPU: Intel Core i7-8750H
 GPU: NVIDIA GeForce GTX 1060 6GB GDDR5
 RAM: 2x16GB DDR4
 SSD_NVMe: WD SN520 M.2 80mm 256GB
 SSD_SATA: Kingston A400 2,5" 960GB
 Display: 15.6" 1920x1080 IPS 60Hz
 OS: Windows 11 Home
