What you see is what you get.

Sony H4413, XA2 Plus with open bootloader for easy alternative OS installation. DualSIM.
It was always kept in the cover and even the original screenprotector plastic film is still not removed.
Currently it has Lineage OS (as android 10) and ready to be used. Selling since long time I have not played with it. (Originally bought to try the Sailfish OS from Jolla)

Minimum price question is not answered
