New Imperial Model 23 from 1936. 150 cc O.H.V.

New Imperial was a progressive British manufacturer with many successes in racing. This New Imperial is a four-stroke with 'Unit Construction', with the engine and gearbox forming a whole, certainly modern for that time.

In 1936, 762 units of the Model 23 were produced.

This rare New Imperial has been in a collection for a long time.

The Model 23 is nice and complete and the engine block is loose, needs to be restarted.

With English documents, 250cc on.
