

Senior Cost Engineer

Locatie **Zeeland, Terneuzen**
<https://www.advertentiax.nl/x-1712314-z>

For our client in Antwerp we are hiring a Senior Cost Engineer.

Bedrijfsomschrijving

Nouvall Engineering Services is specialized in project support for the (petro) chemical and maritime industry.
 We provide expertise in the field of Engineering, Project Management, Maintenance, Shutdowns, Construction and Safety.

Functieomschrijving

The Cost Engineer will provide the cost engineering services to control the cost of the project from current Execute phase until the end of the construction.

The project cost baselines are controlled throughout the entire lifecycle of the project from Execute to Start up.

Internal factors influencing the job are regular rapid, transparent communication of project cost at completion, forecasting cash flow needs & creation of procedures or work processes to control cost, including monitoring change and their impact.

Important external factors are financing institutions requests, EPCm contractor and sub-contractors.

---	--	--	--	---	--	--	--	--	--

-
- Ensures all proposed change requests receive cost impact assessments beginning with Execute project phase.
 - Support the auditing efforts by the banker's engineers chartered by the external financing institutions.

Functie-eisen

- A Bachelor degree in a technical discipline, or equivalent, is preferred but not mandatory, anyhow there is need to share a common understanding, based on "scientific principles and techniques", with the engineering function.
- A minimum of 15 years experience in a process industry production and/or engineering environment with large (>\$100MM) capital project management experience. Mega-project experience (>\$1000MM) preferred.
- Thorough working knowledge of Project Controls practices.
- This job could require periodic travel to the EPCm contractor, IPMT (Reading) office for work with the owner Team and the PMC, and then to be located in Antwerp during the construction and start-up of the facilities.

Technical skills:

- Good understanding of chemical engineering and chemical plant operations and project engineering, quantity surveying.
- Good financial skills: cost classification, cost type, cost accounting, project performance measurement, forecasting, project change management, asset.
- Good working knowledge of cost management tool like EcoSys & SAP PS.
