

Maintenance Field Planner

Locatie **Zeeland, Terneuzen**
<https://www.advertentiax.nl/x-1719809-z>

For a client in Zeeland, we are looking for a Maintenance Field Planner.

Bedrijfsomschrijving

Nouvall Engineering Services is specialized in project support for the (petro) chemical and maritime industry. We provide expertise in the field of Engineering, Project Management, Maintenance, Shutdowns, Construction and Safety.

Functieomschrijving

As a Maintenance Field Planner (Mechanic and/or E&I) you will create job packages from the work order scope which contains all the information regarding required labor material and services to ensure safe, effective and efficient execution of the work. For this role, broad technical skills in analytical/scientific methods or operational processes to perform a defined array of activities is required. You may act as an informal resource for team members with less experience.

What are you going to do?

- You use feedback from the person doing the work to optimize the work plans.
- You review work orders for technical completeness and returns work orders to gatekeeper, if not complete.
- You put out field orders when needed.
- You create job packages and inputs for the ERP indicating required labor, material and services.
- You create purchase orders.
- You identify task activities necessary to execute job plan and identifies materials/tools/equipment required to perform tasks.
- You identify/solicit safety information and requirements necessary to safely perform tasks.
- You support Maintenance Procedure Use Policy by ensuring all job packages include procedure or the task is on the Procedure Exemption list before the job package is released.
- You check that all Maintenance Procedures include a hazard assessment.
- You serve as a technical resource during procedure creation and review, as needed.
