Generalbytes BAMThree Bitcoin ATM.

This device was never used. It was created as a demo machine for a crypto currency but the project was never finished so it's as good as new. However, the firmware was updated from the original one so whoever wants to use it probably has to reset everything.

The machine has been gathering dust for a few years so I can give no guarantee if it still works or not.

Might be good as a display piece or for spare parts.

Device has to be picked up from our office in Amsterdam Centrum. It's very heavy, about 400.
