Asus Aura Sync Lighting
 NVIDIA G-Sync Compatible
 Features

The 23.8" Republic of Gamers Strix XG248Q 16:9 240Hz FreeSync Gaming monitor from Asus is built

with multiple hardware and software features designed to enhance your gaming experience. With AMD FreeSync and NVIDIA G-Sync, this monitor can sync its refresh rate with your graphics card's frame rate output to reduce screen tearing, stuttering, and ghosting for a smoother experience. Specs-wise, it has a 1920 x 1080 Full HD resolution, a 400 cd/m² brightness rating, a 1000:1 static contrast ratio, and support for 16.7 million colors. In addition, it has Extreme Low Motion Blur technology, a 1 ms response time, and a 240 Hz refresh rate for fluid gaming. Connect this display to your system via HDMI or DisplayPort and then adjust it to your viewing preference. You can also install an additional 100 x 100mm VESA mount, stand, or arm if needed.

NVIDIA G-Sync Compatible

While this may be an AMD FreeSync monitor, it's also compatible with NVIDIA G-Sync via an update to the latest video drivers.

AMD FreeSync Technology

AMD FreeSync Technology syncs the display's refresh rate with your graphics card's frame rate output to reduce screen tearing, stuttering, and ghosting for a smoother gaming experience.

240 Hz Refresh Rate

A 240 Hz refresh rate provides you with fluid gaming, which is especially important in fast-paced action scenes commonly found in FPS, sports, and racing games.

Asus Extreme Low Motion Blur Technology

Asus Extreme Low Motion Blur Technology enables a 1 ms MPRT (Moving Picture Response Time) to reduce smearing and motion blur, making images look sharper.

Asus Aura Sync Lighting

The Asus Strix XG248Q is equipped with Asus Aura Sync Lighting, which offers millions of colors and multiple lighting effects to choose from, so you can personalize your setup. Moreover, it comes with two logo covers and a blank one, which you can customize for a unique light projection on your desktop surface.

GamePlus Technology

GamePlus Technology includes multiple enhancements and add-ons designed to help your game. It has features such as Crosshair, Timer, FPS Counter, and Display Alignment.

Asus DisplayWidget Software

This software lets you adjust multiple settings including ones from the GameVisual and App Sync software. It also lets you enable Ultra-Low Blue Light technology and offers shareable settings that you can copy and share with others who have the same monitor.

Ultra-Low Blue Light Technology

Ultra-Low Blue Light technology provides you with four filter settings to best fit your current application and reduce blue light emissions, which can cause eyestrain and fatigue over extended viewing sessions.

Flicker-Free Technology

Flicker-Free technology reduces screen flickering to minimize eyestrain and fatigue during marathon gaming sessions.

Adjustments

This monitor supports swivel, pivot, height, and tilt adjustments to best fit your viewing preference. Otherwise, you can install an optional stand, mount, or arm using the 100 x 100mm VESA mounting holes on the back.

Doe een redelijk bod, bieden vanaf 200, vraagprijs 250. Tijdje geleden nog refurbished verkocht in een winkel voor 380. Heeft nieuw 600 gekost. Bieden via marktplaats.
