

# Quantum Triradiaal Asymmetrische Code 0 (A0) op furler

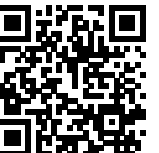

Locatie **Friesland, Workum**  
<https://www.advertentieX.nl/x-1752332-z>

Quantum Code 0 met Karver Furler te koop komt van een Hanse 430 en zeil is van 2016.

ISP: 18,200 m  
 Jc: 5,320 m  
 Oppervlakte: 89,925 m2

Constructie: Ontworpen met Quantum's iQ software technologie.  
 Tri-Radiaal uitgevoerd in Contender ZL06 CO doek (60%), Contender ZL04 CO doek (40%). Alle banen en overmaatse hoekversterkingen worden met een laserarm gesneden. "High load" gedeeltes worden extra verstevigd en de RVS hoekringen worden met polyester of spectra banden versterkt.  
 Inclusief: Tri-radiaal banenschema inclusief voorlijk- en .

|                                                                                                                                                                                                                                                               |                                                                                                                                                                                                                                                                |                                                                                                                                                                                                                                                                |                                                                                                                                                                                                                                                                |                                                                                                                                                                                                                                                                 |                                                                                                                                                                                                                                                                  |                                                                                                                                                                                                                                                                  |                                                                                                                                                                                                                                                                  |                                                                                                                                                                                                                                                                  |                                                                                                                                                                                                                                                                  |
