I am selling my 34" Ultrawide Samsung Monitor because I upgraded to an even bigger screen for my office.

This monitor is in perfect condition, I had it for just half a year. It's the perfect monitor to work with modern laptops, because a single USB-C cable can provide the video signal, USB-hub, network-port and charging for your laptop! All parts, cables and original package included.

I am also selling a monitor arm to mount the screen to the desk. If you buy both, I give you 50% discount on the monitor arm.
