27-inch screen and a Quad HD resolution of 2560 x 1440 pixels. It also supports HDR10 and it comes with IPS panel, which is great for gaming. The contrast is very good and the blacks are the most similar thing you can find to the "real black" from OLEDs.

The response time is very fast (1ms), great for shooters and competitive multiplayer games. I bought it last year and it is in perfect condition. I'm buying a bigger.
