

Project Engineer Eampl

Locatie **Zeeland, Terneuzen**
<https://www.advertentiax.nl/x-1776961-z>

For our client we are hiring a Project Engineer E&I.

Bedrijfsomschrijving

Nouvall Engineering Services is specialized in project support for the (petro) chemical and maritime industry. We provide expertise in the field of Engineering, Project Management, Maintenance, Shutdowns, Construction and Safety.

Functieomschrijving

As E&I Project Engineer you are part of a multi disciplinary team and responsible for supporting the design of the entire E&I installation during all engineering phases. You design, implement and commission E&I installations in projects ranging from large investment projects to innovations and modifications in process installations, buildings and infrastructure. Within this role you also ensure that E&I scope is realized on time and within budget, whilst meeting the applicable quality requirements, laws and regulations.

- Supervise safety, quality, planning and budget of E&I projects.
- Act as project leader on key E&I projects.

- Prepare E&I specifications such as control cabinets, power distribution panels and process instrumentation.
- Perform technical verification and process verification of E&I designs.
- Design and update E&I documentation (e.g. drawings, EX reports, hazardous areas).
- Define and approve E&I information on P&ID status documentation.
- Provide expertise in scope reviews, H&ZOP, alarm reviews, safety audits and investigation teams as required.
- Identify opportunities for improved plant performance through application of E&I technology.
- Experience with high voltage power distribution is an advantage.
