This is an old kindle e-reader, I don't know what model or year but it is quite old already. I think it still works if you connect to your Amazon account.
I do not have the charger anymore, but it is a regular micro USB plug as you can have for Samsung phones for example.
The case is cognac leather type, and has a lamp for reading in the dark. I think it only works when the kindle is on.
I give it away for free if anyone is interested!
To collect at my place in. :)
