For sale: Acer Nitro 5 laptop featuring a large 17.3-inch FHD 144Hz display for immersive visuals. Powered by a Ryzen 5 5600H processor and an RTX 3060 6GB GPU, it delivers robust performance for gaming and productivity. I have upgraded the ram and ssd, so you can enjoy enhanced multitasking with the upgraded 32GB DDR4 3200MHz RAM, and ample storage space with the expanded 1.5TB SSD. You can also do dual-boot with linux on one drive and windows on other drive (which I use right now)

It has a standard US keyboard layout as can be seen on the images.

There are a few minor scratches on the back of the device, but perfect.
