Opel Astra K Sports Tourer 1.4 Turbo. Car is coming from Netherlands market. I'm the second owner of the car, bought it in 2020 with mileage of 27000km and now it's 91000km (80% is motorway mileage). Car is in very good shape, looks almost new and it was kept in the garage. All services was made on time in authorized stations. Last service was made in 09.2023 and it was big service with new breaks for front and back (invoice for 1360EUR). Currently car don't need any investment and when buying it from me you can drive for long time without worry about it. Car is in very rich configuration, it comes on nice 18inch wheels, originally tinted back windows, it parks automatically, have adaptive lights, keyless entry, lane assistant, trunk door opened/closed with button or gesture, parking camera, dead zone sensors, many, many more. There is also towbar for the car but it's removable so you can easily dismount it if you don't use it daily. Pretty sure if you come to see the car you will be surprised how well maintained is the car and take it right away also saving yourself a lot of time with watching cars from car dealers which very often are scratched all around and have defects or need investments. Here you are buying Astra from very good.
