

Acer Nitro 5 AN517-54-71RN - RTX 307024GB 1T Upgraded

Locatie **Utrecht, Maarssen**
<https://www.advertentieux.nl/x-1795154-z>

Laptop have 24gb of ram inside and + 8 GB original RAM will be added with laptop and original 512gb RAM SSD as a gift. I spent 1700 € last year, I took it from cool blue. Windows license will be on you email so you can reinstall windows whenever you want.

Gaming laptop is free of any scratches and battery is in perfect condition (windows application says battery health 99%). I will be reinstalling the operating system, returning it to a state akin to being brand new. Ideal for gaming, the laptop has consistently exhibited optimal performance, devoid of heating issues or lag. I possess an electronic receipt from the initial purchase.
 In addition, I have made enhancements to the laptop, including the installation of a WD Black SN850X 1TB M.2 SSD and a Crucial DDR4 SODIMM 16GB RAM module, augmenting the original 8GB. This, coupled with the migration of the operating system to one of the top three fastest SSDs on the market, results in swift game loading times, rapid file transfers, and expedited picture uploads.
 Despite these improvements, I find myself in a financial predicament, prompting the sale of the laptop. In the process, I will be including the original 8GB RAM module that was initially part of the laptop configuration.

GTA5, DayZ, Call Of Duty MW2 works on extreme graphics with no lag.

P. S no chance finding it cheaper on mediamarkt, cool blue and similar websites + this laptop upgraded
