Hello everyone,

I am selling my gaming laptop with a powerful cooler including both original packagings because I am passing to a desktop pc.

Specification:

Led panel: 15.6",IPS, anti-glare, 165Hz
 Resolution: 2560x1440 (Quad HD)
 CPU: Intel Core i7-11800H (8 cores)
 GPU: RTX3080 16GB GDDR6
 Storage: 2TB SSD
 RAM: DDR4 32GB

The laptop works perfectly as new, it's very fast and you can play games like Cyberpunk 2077, Howgart Legacy, Spiderman, Call of Duty, with ultra settings and ray tracing on above 100fps.
 I bought it 3200 € but I am selling it for 1500€ because how you can see from the pictures it has a small dent on the outside part and a 0,5mm line on the screen that believe me you would never notice even with a white background, however I have made the picture to be transparent.

It's possible to see it in person and check it before to buy.
