

## Netgear Switch 8-port Gigabit GS108E (37 EUR)

Locatie **Noord-Brabant, Breda**  
<https://www.advertentiax.nl/x-1800382-z>

Voor 22:30 besteld, morgen in huis!

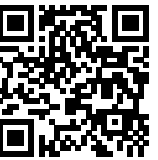

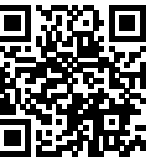

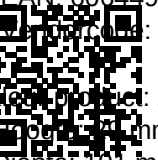

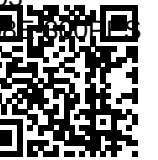

De NETGEAR ProSAFE 8-Poort Gigabit Web Managed (Plus) Switch biedt fundamentele netwerkfuncties die de prestaties van zakelijke netwerken helpen optimaliseren.

NETGEAR ProSAFE 8-poort Gigabit Web Managed (Plus) Switch

Controle en Configuratie die verder gaat dan Plug-n-Play Connectiviteit

- 8 poorten leveren tot 2000 Mbps toegewijde, niet-blokkerende bandbreedte per poort.
- Gigabit snelheid met QoS, VLAN en netwerkmonitoring.
- VLAN-ondersteuning voor verkeersegmentatie.
- Quality of Service (QoS) voor verkeersprioritering.
- Automatische Denial-of-service (DoS) preventie.
- Verbindingsproblemen oplossen door middel van een kabeltest.
- Luspreventie en ethernetstormcontrole.
- IGMP-snooping voor multicast-optimalisatie.
- Snelheidsbeperking voor betere bandbreedteverdeling.
- Gespiegelde poorten voor netwerkmonitoring.
- Jumbo frame ondersteuning tot pakketgrootte van 9KB.

|                                                                                                                                                                                                                                     |                                                                                                                                                                                                                                      |                                                                                                                                                                                                                                      |                                                                                                                                                                                                                                      |                                                                                                                                                                                                                                       |                                                                                                                                                                                                                                        |                                                                                                                                                                                                                                        |                                                                                                                                                                                                                                        |                                                                                                                                                                                                                                        |                                                                                                                                                                                                                                        |
