I decided to seel this great machine after more than 10 years of use. I did my Engineering thesis, running heavy software tools, such as MATLAB and other engineering-related software.

I edited a lot of videos using imovie, it's a beatiful machine. At one point, I even had dual boot configured, running windows + MAC + a virtual machine with LINUX, all running very smoothly. I recently changed battery and it's back to the configuration screen for the new user to start the out-of-the-box experience.

Accessories: - original + spare power adapters

- network LAN to thunderbolt adaptor

- VGA / HDMI to thunderbolt adaptor

- protective sleeve for transportation Reason I'm selling it is that I'm not using anymore, since I have work computer and when I'm at home, I pretty much do all I need with my iPhone, so it just makes me sad see my macbook there all abandoned... Here is the model if you to consult specs online for this MAC (I have the i5 processor and 256 GB storage, 4GB RAM version): MacBook Air (13-inch, Mid 2013) Please feel free to reach out and send your price
