

# HP ML350P Gen8 rack versie (incl. Rails) (250 EUR)

Locatie **Noord-Brabant**  
<https://www.advertentiax.nl/x-1805384-z>

Meer info en foto's komen nog!

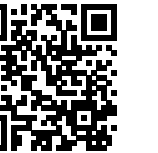

Goed werkende G8 server van HP, word geleverd met 14 sas schijven en alle bijbehorende trays  
 2x 500gb Seagate HDD  
 6x 146 GB HP SAS HDD  
 2x 300 GB HP SAS HDD  
 4X 600 GB HP SAS HDD  
 2X 900 GB HP SAS HDD

Verder zitten er 2 xeon e5-2670 v2 processoren in met totaal 40 threads!

Ook zit er 80gb aan werkgeheugen in dus al met al een hele mooie eerste server voor je homelab

Heb er zelf altijd proxmox op gedraaid icm truenas  
 En andere vms en eigenlijk super goed gedraaid, het word voor mij echter wat te duur om 3 servers tegelijk te draaien dus ben ik naar beneden aan het schalen.

Alles werkt uiteraard en is dus ook werkend te

|                                                                                                                                                                                                                                           |                                                                                                                                                                                                                                            |                                                                                                                                                                                                                                            |                                                                                                                                                                                                                                            |                                                                                                                                                                                                                                             |                                                                                                                                                                                                                                              |                                                                                                                                                                                                                                              |                                                                                                                                                                                                                                              |                                                                                                                                                                                                                                              |                                                                                                                                                                                                                                              |
