Het concept omvat een digitaal gecodeerd beveiligingssysteem dat uniek is voor uw waterscooter. Het fungeert als effectieve afschrikking tegen diefstal. Daarnaast begrenst de leersleutel de vaarsnelheid voor beginners.

170-Pk ROTAX 1630 HO ACE

All Sea Doo Engines now offer Advance Combustion Efficiency.

This engine continues to be a benchmark for reliability, performance and fuel economy, proven power, low overall weight, and ease of maintenance.

CONVENIENCE FEATURES

This model comes standard with 31 US gal. (117 L) of storage space, a touring seat, a boarding ladder and additional gauge functions (fuel consumption, clock).

INTELLIGENT BRAKE AND REVERSE (iBR)

Recognized by the U.S. Coast Guard for improving boat safety since 2009 and now in its third generation, the Sea-Doo exclusive iBR system allows you to stop up to 160 feet (48 m)* sooner than watercraft not using a brake. With both hands on the handlebars, riders can engage forward, neutral, and reverse for stable, worry-free maneuvering at low speeds.

VARIABLE TRIM SYSTEM

Adjust the nose angle of the watercraft higher (for better stability at high speeds) or lower (for towing and quick starts) based on rider preference, water conditions, and number of passengers.

INTELLIGENT THROTTLE CONTROL

Choose how you want your power delivered thanks to different riding modes such as Sport and ECO - available through your watercraft digital information center.

CLOSED-LOOP COOLING SYSTEM

This technology prevents corrosive saltwater and damaging debris from entering the engine, for increased reliability and peace of mind.

ANTI-THEFT SECURITY SYSTEM AND iCONTROL LEARNING KEY

A Digitally Encoded Security System unique to your watercraft that serves as an effective theft deterrent.
Learning Key also limits speed for beginners.
