Passend voor Harley Davidson

Harley Davidson FLHS 1340 Electra Glide Sport Achterzijde 1987-1988-1989-1990-1991-1992- 1993  
 Harley Davidson FLHT 1340 Electra Glide (all models) Achterzijde  
 1986-1987-1988-1989-1990-1991-1992-1993-1994-1995-1996-1997-1998-1999  
 Harley Davidson FLT 1340 Tour Glide (all models)  
 Achterzijde 1986-1987-1988-1989-1990-1991-1992-1993-1994-1995-1996-1997-1998-1999  
 Harley Davidson FLTR 1340 Road Glide (all models) Achterzijde 1998 - 1999  
 Harley Davidson FLHR 1350 Road King (all models) Achterzijde 1994-1995-1996-1997-1998-1999

De remblokken zijn Splinter Nieuw! Worden nieuw, in de verpakking geleverd.

Let op: Het betreft een set remblokken voor 1 remklauw.

Artikel nummer Ferodo: FDB485

Rem de eerste 100 kilometer rustig. Nieuw remblokken zijn nog helemaal vlak en moeten eerst "inlopen" op de groeven van de remschijf, voordat ze voluit belast kunnen worden.

De normale nieuwprijs is 27.95 per set! Nu ook nieuw voor maar 15 euro,

|                                                                                                                                                                                                                                                                 |                                                                                                                                                                                                                                                                  |                                                                                                                                                                                                                                                                  |                                                                                                                                                                                                                                                                  |                                                                                                                                                                                                                                                                   |                                                                                                                                                                                                                                                                    |                                                                                                                                                                                                                                                                    |                                                                                                                                                                                                                                                                    |                                                                                                                                                                                                                                                                    |                                                                                                                                                                                                                                                                    |
