Te koop Duotone wham sls 5.9 2021

The Wam SLS remains at the cutting edge of high-performance surfboard design, and the new construction takes things even further. This classic looking shape has a lot going on under the hood, from the wide point forward design to the squash tail and the channels underneath. All of these aspects are designed to offer you the maximum speed on the wave, in any given condition, but to couple that pace with total control. These attributes are what makes it so versatile too, from small onshore conditions to firing down the line fast waves the Wam SLS can offer you exhilarating performance and unrivalled confidence to pull your turns in the most critical sections. The board is the go-to surfboard of choice for our team riders competing on the GKA World Tour, thanks to its fast, lively and agile feel. It offers them the perfect balance from fast drawn out carves to radical vertical turns on the face. Even when the waves are weak, there is plenty of power on tap, and lots of speed to be gained when you drive the board from the feet through the turn. If your wave riding takes you to a myriad of different spots, and you want a board that can perform to the highest level at all of them on any given day, then the Wam SLS is the.
