Yamaha - R6 1999 with 50.340 km on selling. The bike has been restored completely from a couple weeks ago. It's absolutely nothing to do or adjust on the bike to feel it in a perfect shape. Really nice motor for the people who really like the carburation engines. And the restored motorcycles.

Last maintenance:

(As a in the last picture you can see), it has:

- Cleaning, new fluid and new pads on the front and on the rear break.
- Cleaning, new oil, new seals and an adjustment on the fork.
- Checked and weight adjustment on the suspension.
- Valve adjustment.
- Compression of every single cylinder checked.
- New air filter.
- New coolant.
- New fuel pump, new fuel filter, new fuel hose and new seal for the fuel petcock.
- Carburetors cleaned, remaked with new bolts and seals and synchronised.
- New clutch cable.
