

Project Leader Mechanical

Locatie **Zeeland, Terneuzen**
<https://www.advertentienx.nl/x-1822456-z>

For our client we are hiring a Project Leader Mechanical.

Bedrijfsomschrijving

Nouvall Engineering Services is specialized in project support for the (petro) chemical and maritime industry.
 We provide expertise in the field of Engineering, Project Management, Maintenance, Shutdowns, Construction and Safety.

Functieomschrijving

As Project Leader you are part of the engineering team, which has the prime responsibility to execute the site capital investment program.
 In this role you are responsible for managing multiple projects from the feasibility phase to start-up supported by a multidisciplinary team.
 The projects range from large investment projects and innovations to smaller modifications in process installations, buildings and infrastructure. You ensure that the project is executed safe, on time and within budget, whilst meeting the applicable quality requirements, laws and regulations and all requirements.

- Manage projects with top-down oversight from feasibility to start-up phase to ensure success as defined

by adherence to standards of safety, scope, budget, and timeline.

• Develop, comprehend, and implement plans for the customer's projects with primary goals of cost, quality, and technical excellence during all project phases, from initial development through implementation.

• Update project status all stakeholders, update the progress and anticipate delivery impediments, risks, issues, and changes tied to critical project milestones.

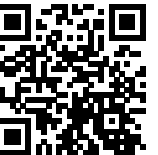

• Convert process design options into project cost estimates to enable investment decisions.

• Prepare technical specifications for civil, steel and mechanical works and conduct technical bid evaluation and supplier clarification meetings.

• Lead multi-disciplinary project teams and initiate and coordinate technical reviews with end users and maintenance.

• Supervise field construction activities together with the site construction supervisor.
