

2.9 litre, 6-cylinder twin turbo gasoline engine. Automatic gearbox. Portuguese car. Zero rust and no sun damage. Car has always been garaged. Car is now in Amsterdam.

The car had recently had extensive revision work done that includes the suspension, engine and gearbox. All receipts are available to show more than 10 000 euros of work done on it in the past year.

Only reason I sell it is because I did not anticipate parking problems for my car here in Amsterdam. It is now temporarily parked in a garage but I cannot use that garage forever. I do not want to see this car stay outside.

The car had a few upgrades like Bilstein suspension and a nice touch screen radio with reverse camera. This radio was 1000 euros and is top of the line incorporating all original features of the car. The A/C work 100%, dual climate control work great, heated seats front and rear, cruise control, sun roof, rear sun shade and absolutely every other electronics function is perfect. Car has original sat-nav as well as

screens in the rear head rest coupled to a working DVD player and it even has a working fridge in the rear seat area in the rear initial shelves

and comfort. Great cruisers and very economical if you don't have a heavy foot. Super quiet at high speeds and the seats are very comfortable for long journeys.

You will never again see a 1st generation T6 like this on the market again. Website [www.car.info/en-se/volvo/s80/s80-t6-a4-2004-6319350](http://www.car.info/en-se/volvo/s80/s80-t6-a4-2004-6319350)
