The LG 27UP85 is a modern 27" monitor that is ideal for productivity and relaxation. The 27UP85 from LG has a USB-C with 90w power delivery: ideal for your Macbook (Pro) or Windows laptop. This allows you to simultaneously work in 4K resolution, transfer data and charge your laptop or other mobile device with 94w with just one cable. In addition, you can use the monitor for your (home) office thanks to built-in speakers and a height-adjustable base. The color reproduction is slightly better than comparable models in this segment, thanks to HDR400 support and the preset color.
