1999 Mulder & Rijke, Ribsea 700

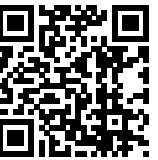

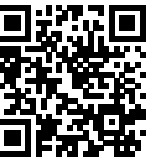

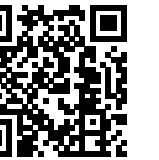

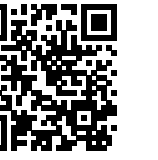

Heavy duty RIB boat with Hamilton jet propulsion. Boat has been used in military at first and is rebuild with a bigger/newer engine and a larger jet-drive. The jet drive is a Hamilton 213, connected to a Yanmar 4lha-stp (4-cil, turbo) the boat has 2 new chart plotters wich are connected to the engine data by a antisense EMU-1. The boat has a new suntop build of aluminium wich is completed by a large series of lights and extras.

the inner tubes seems to be in good condition, the tubes are reinforced with foam so there is no complete deflation possible. This also protects the inner tube from being punctured of damaged. (real heavy duty work boat).

The rebuild is almost finished, there are still some points like the seating, cleaning, calibrating the emu-1 engine sensors.

Electrical system has been completely renewed and finished already.

Boat weights a little over 2 tons (kg) and can be sold including the trailer. (trailer has nog license plate jet, but I am trying to get this fixed in the next few months.
