Good for high fps 1080p gaming and streaming. The whole system is fitted with customizable aRGB and has a very clean white aesthetic. Very easy to clean due to the easy to remove side and front panel. The system provides a good upgrade path due to it being build on the am4 platform its possible to upgrade to the newer generation processors from amd later down the line for when you want to get into the pc building hobby yourself or if you just need that extra juice.

Can run most games at high settings.

For instance:

Fornite, gta 5, cyberpunk 2077, valorant,

Red dead redemption 2, call of duty,

The witcher 3, roblox, baldurs gate, hogwards legacy and many more.

Specs:

-Ryzen 7 3700x

-Asus prime b450m-a II
