Mini Linux server van Globalscale Technologies
Merk: Dreamplug
Inclusief originele doos.

Vraagprijs: 25 euro excl verzendkosten

Beschrijving van Wikipedia:
DreamPlug is a compact and low power plug computer running Debian Linux, based on Marvell's Kirkwood 88F6281 ARM9E SoC. It is intended to be a device that could act as a web server, a printing server or any other network service. It uses micro-SD internal storage and an external Secure Digital slot, but also offers USB ports and a Serial ATA port to connect external disks. The DreamPlug is an evolution of the GuruPlug, based on the SheevaPlug platform.
