I'm selling this fantastic HD, just finished. All blacked-out parts are brand new: clutch, transmission, timing covers, cam covers, RSD air filter, fat handlebar, levers, mirrors, mini Kellermann tri-functions led indicators, tires with 0 km, full complete maintenance, seals, gaskets, fluids, new battery. Dashboard converted to modern cat-eye led indicators. There are other expensive custom parts, mostly handcrafted (front and rear fenders, struts, the fantastic leather seat by Spirit Leather-check the pricing, please!). Even the tank logos are handcrafted with Murano curved, double-layered glass. Paintjob is absolutely amazing: made by Lisa at her professional atelier 'Dutch on Wheels', it was shown at the last HD event in Amsterdam.

This is a used bike, already registered in the dutch RDW system, so the license plate will stay the same. I normally use to give names to the bikes that I customize: this one's is "SIGUANABA": in Latin America, it is believed to be an evil female spirit which attracts people with its beauty, takes them away and never lets them go.

If you are interested, please contact me: I have many other pictures/videos available and I will provide you with all info you may need..
