The reason for sale is that I purchased a Focus RS.

I've had fitted the 11" Alpine iLX-F115D screen which is fully compatible with all of the controls on the car. You can connect wirelessly to Android Auto with a USB dongle that is also attached.

I have the original OEM equipment too just in case the buyer wants to revert to the original setup which is SYNC 1.

I enjoy paint correction and so the paint is spotless all over. I spent a lot of time working on this.

The alloys have been dipped black and the calipers painted red all round.

It has new winter tyres.
