Intrepid® can also connect to a variety of accessories. The Quick™ Fuel System™ is also easily attached to a fuel caddy and a bag, or a cooler, to the back of your watercraft using two convenient, integrated attachment points.

ST3 HULL

Whether you're at high speeds pounding rough offshore waters, at rest hanging out in a cove or you're simply boarding from the side, the wider hull offers industry leading stability thanks to a lower center of

gravity and improved hull design.

LARGE SWIM PLATFORM

The first watercraft to hang out on the water with the largest swim platform in the industry. Flat, stable and comfortable, it is ideal for boarding, lounging, and prepping for tow sports. Create even more space by removing the rear seat.

DIRECT ACCESS FRONT STORAGE

All your gear is now within arms reach. The industrys first direct-access front storage opens by simply raising the handlebar assembly. No standing required. It's the smartest water-resistant storage we've ever built into a watercraft, offering room for your next adventure.

ERGOLOCK SYSTEM WITH MODULAR SEAT

The narrow racing seat places your knees closer together to hold on tighter while improving the transition into standup riding. Plus, the removable rear seat gives you even more space for hanging out on the rear platform, sunbathing or a face-to-face picnic.

ROTAX 1630 ACE ENGINE

Supercharged with an external intercooler, the Advanced Combustion Efficiency (ACE) technology delivers high efficiency and amazing acceleration. This is the most powerful engine on a Sea-Doo producing a thrilling 300-hp.

X PACKAGE

Add on the performance package. With X-Sponsons for cornering stability and our innovative ErgoLock System featuring a narrow racing seat, specially angled footwell wedges and adjustable X-steering, you and the machine become one.

HIGH PERFORMANCE VARIABLE TRIM SYSTEM WITH LAUNCH CONTROL

Quickly access the Variable Trim System (VTS) on the handlebar for fine-tuned handling based on rider preference, water conditions, and number of passengers. The RXT-X also features a 30% extended range VTS, giving the rider an increased ability to customize the handling of the watercraft. Plus a handlebar-activated launch control to provide perfectly controlled acceleration.

BLUETOOTH AUDIO SYSTEM*

The industry's first fully-integrated waterproof Audio System will keep the fun going anywhere you go, with 100 watts of total system power, fully-waterproof performance, Bluetooth connectivity, and external playback controls to ensure the perfect song is always on deck.

WATERTIGHT PHONE BOX

A watertight compartment with integrated USB port* allowing your devices, including phones or action cameras, to stay charged and ready to go in an impact-absorbing, watertight cradle.

INTELLIGENT BRAKE AND REVERSE (iBR)

Recognized by the U.S. Coast Guard for improving boat safety since 2009 and now in its third generation, the Sea-Doo exclusive iBR (Intelligent Brake and Reverse) system allows you to stop up to 160 feet (48 m)* sooner than watercraft not using a brake. With both hands on the handlebars, riders can engage forward, neutral, and reverse for stable, worry-free maneuvering at low speeds.

7.6" WIDE DIGITAL DISPLAY

The all-new 7.6" wide digital display offers riders an improved user experience when cycling through modes and locating vehicle information. It also features an automatically dimming backlight that ensures high visibility in any light. The larger display area, as well as large digital numbers and letter, makes for improved visibility when riding.

CLOSED-LOOP COOLING SYSTEM

This technology prevents corrosive saltwater and damaging debris from entering the engine, for increased reliability and peace of mind.
