Selling my iPad, with apple pen, and 2 cases. I will include the charging cable and original packaging.

I bought this iPad to take notes during studying. But I ended up taking notes on my laptop more so I've barely used it. Sadly I took it with me once and it got wet so there is some minor damage on the screen (see pictures). Besides that the iPad is fully functional, barely used, and doesn't have any scratches due to me always the protective cases.

If you have any questions feel free to send me a.
