BARRACUDA IM Firewall 220

The Barracuda IM Firewall is the first complete IM solution to provide both IM Server and IM Gateway technologies to help organizations secure, log, and manage the use of instant messaging on their networks.

The Barracuda IM Firewall is easy to set up and rollout to your users. Installing a unit inline takes just minutes. Once connected, all public IM traffic is captured and logged to an internal database. With an intuitive user interface for maintenance and monitoring, the Barracuda IM Firewall is a virtually administration-free solution.

Energize Updates

Barracuda Energize Updates provide Barracuda Networks appliance with the protection from the latest Internet threats. The team at Barracuda Central continuously monitors the Internet for new trends in network security threats and develops strategies to mitigate those threats. Depending on the appliance, Energize Updates include the appropriate definitions for spam, virus, content categories, spyware filter, intrusion prevention, IM protocols, policies, security updates, attacks and document formats. Updates are delivered on an hourly basis to ensure you always have the latest definitions and the most comprehensive protection.
