I am selling my gaming laptop. I bought it in November 2022 and I was using it occasionally for gaming.

During the whole time, it was used in docked position on a table with an external monitor, keyboard, and cooling pad and I did not carry it around in a backpack or something. Its keyboard and screen were used very little.

It was not thermally stressed thanks to the cooling pad. Its condition is almost brand new and there is no scratch or cosmetic issue on the chassis even.

It has the fastest 12th-gen i9 processor and one of the fastest RTX 3070 ti GPU with 150 watt power.

Thanks to 17 inch chassis, its thermal headroom and cooling system is larger than a 15 or 16 inch laptop and it can sustain high power loads for quite long time without performance degradation. You can see some benchmark results in.
