Key Features

Swim platform extension extends beyond the outdrive for peace of mind getting in and out of the water. Stainless steel ladder is mounted under the platform so it can be reached from the water and extends three steps deep for easy boarding from the water. Walkthrough from the swim platform to the cockpit makes boarding easier and reduces wear on upholstery. Versatile transom storage trunk for watersports equipment, docking lines, and fenders. Large open cuddy cabin features full-height seating that converts to a spacious double berth, and a private head location for the optional portable head.
