

Touratech Comf seat DriRide, BMW R1200GS 2012 ADV tot x2713 (375 EUR)

Locatie **Gelderland, Putten**
<https://www.advertentiax.nl/x-1930424-z>

Kan dit? Ja het kan!

Voor de R1200GS luchtgekoeld 2004-2012 (Adventure 2013) kan jij jouw zadel ombouwen naar een 1-delig zadel. Waarom? Omdat het veel beter zit, je kan beter verschuiven en de juiste plek vinden. Buitendat is het ook nog een zadel van touratech wat sws al veel beter zit. Ombouwen is nog geen 10 minuten werk.

Dus ga jij vol comfort de zomer in?

Kijk anders even op de pagina van Touratech

" Comfort seat one piece DriRide, for BMW R1200GS up to 2012/R1200GS Adventure up to 2013, breathable, high "

Can't sit better than this!

We also offer this popular comfort seat in our patented breathable version for the most discerning riders! The seat construction is based on an open-pored foam core with a spacer fabric around the seat to allow air to flow more easily through the ultra strong, elastic, waterproof textile cover. The result of this elaborate construction is overwhelming, and guarantees maximum riding comfort not only on long rides, but also at high outside temperatures and in extreme humidity. And yet there are no

disadvantages or restrictions in normal every day use. Quite the opposite, in fact, because right from the start, the seat for BMW R1200GS Adventure up to 2013, is designed to be comfortable and to provide maximum riding comfort. The seat for BMW R1200GS Adventure up to 2013, is designed to be comfortable and to provide maximum riding comfort.

Features:

- Anatomically shaped base of extensive testing in Germany
- Our proprietary high-strength foam provides superior cushioning to prevent pressure sores
- Even weight distribution plus optimised contact with the bike equals perfect control
- Bi-elastic covering material with sealed seams
- Followed recess in the middle of the seat relieves coccyx pressure
- Available in different heights
